

Services

Today's industry leaders face tremendous pressure to stay ahead of the competition and build high quality software applications under severe time-to-market constraints. ABC Virtual provides a broad range of services to help you achieve your strategic business and technology objectives.

- Enterprise application development, focusing on J2EE and .Net platforms
- Workflow and collaboration system design and implementation
- Enterprise application integration, leveraging existing legacy systems
- e-Business production environment configuration and support
- Security planning and implementation
- On-site and off-site project management and application development services
- Product customization and implementation services

ABC Virtual is now offering the same high quality solutions to government entities. In June of 2003, we were awarded the 8a and SEDB designations by the Small Business Administration. In addition, customers will soon be able to purchase services via the GSA 70 Schedule.

Satisfied Customers

Dedication to excellence, a commitment to new ideas, a strong work ethic, and a high degree of integrity form the foundation on which our business is built and continues to grow.

The following is a list of some of ABC Virtual's satisfied customers: Wells Fargo Home Mortgage, Wells Fargo Financial, Principal Financial Group, Allied Insurance, Farmland Insurance, Pioneer Hi-Bred, MidAmerican Energy, John Deere Credit, Maytag, Wellmark BC/BS of Iowa, BancMac, and the State of Iowa.

The Virtual Difference

ABC Virtual's 2-Phase Project Methodology, leveraging Rational Unified Process development principles, is based upon extensive experience in designing, building and deploying large, mission-critical e-business applications. This approach has proven to be extremely effective in allowing all stakeholders to better manage and complete projects under strict time constraints. Our broad range of expertise coupled with our 2-Phase Project Methodology can help you extend the reach of your enterprise quickly and easily by improving efficiency and allowing secure, reliable access to vital enterprise data.

Internet Application Framework (IAF)

ABC Virtual's patent-pending IAF provides an efficient and reliable pure Java infrastructure on which applications can be built to seamlessly distribute, update and manage data over the Internet. It gives companies a significant competitive advantage in deploying mission-critical applications to the Web.

At the Core

ABC Virtual utilizes proven Web-centric technologies to enable your business systems. We have proven expertise in industry leading technologies such as Java, EJB, JSP, Servlets, XML, Messaging, JDBC, ODBC, and ASP. This technological focus has allowed ABC Virtual the opportunity to become proficient in a wide variety of industry leading tools such as IBM VisualAge for Java, IBM WebSphere, IBM WebSphere Studio, WSAD, Rational Rose, MQ Series, Visual Studio and Visual Interdev, as well as experience with many database platforms.

ABC Virtual has been recognized by the Best Manufacturing Practices Center of Excellence (BMP-COE) for its best practices. The BMP-COE has been surveying selected companies for best practices since 1985. ABC Virtual is the first small business and the first software company ever surveyed by the BMP. Please visit www.bmpcoe.org for a copy of our survey.
